Credit Name: Inheritance and Polymorphism
Assignment Name: Account, PersonalAcct, BusinessAcct

<u>Describe the errors you've encountered while working on this assignment. What caused the error and how do you overcome the error?</u>

I also did not encounter any errors for this assignment because I caught them before they became an issue. The only "errors" I made were mistakes that didn't cause any error messages like misspelling or forgetting to change parameters in an if statement from true to something specific.
