Credit Name: File Structures and Exception Handling
Assignment Name: FindAndReplace

Describe the errors you've encountered while working on this assignment. What caused the error and how do you overcome the error?

```
Exception in thread "main" java.lang.Error: Unresolved compilation problems:
        The local variable fileContent may not have been initialized
        The local variable fileContent may not have been initialized
        The local variable fileContent may not have been initialized
        The local variable fileContent may not have been initialized
        The local variable fileContent may not have been initialized

        at Masteries.FindAndReplace.main(FindAndReplace.java:71)
```

I forgot to initialize fileContent with nothing so I added that to fix that error
