Credit Name: File Structures and Exception Handling
Assignment Name: MySavings

Describe the errors you've encountered while working on this assignment. What caused the error and how do you overcome the error?

```
Exception in thread "main" java.lang.Error: Unresolved compilation problem:
        The method nextint() is undefined for the type Scanner

        at Masteries.MySavings.main(MySavings.java:175)
```

I forgot to capitalize the I in nextInt so I added that to fix the error.

```
Exception in thread "main" java.lang.Error: Unresolved compilation problems:
        Type mismatch: cannot convert from FileInputStream to FileOutputStream
        The constructor ObjectInputStream(FileOutputStream) is undefined
        Type mismatch: cannot convert from ObjectInputStream to ObjectOutputStream

        at Masteries.MySavings.main(MySavings.java:229)
```

I copied the code for reading the file so I forgot to replace fileinputstream with fileoutputstream.

```
Exception in thread "main" java.lang.Error: Unresolved compilation problem:
        Unreachable catch block for ClassNotFoundException. This exception is never thrown from the try statement body

        at Masteries.MySavings.main(MySavings.java:253)
```

I added an exception for class not found in the writing to a file section so I removed that to fix the error.
